

FOR IMMEDIATE RELEASE

### **YourLocalDJz.com Debuts New Custom Playlist Feature**

Las Vegas, Nevada, Oct. 7, 2010 — Wedding DJs LLC, a leader in providing custom Wedding DJ solutions for couples getting married Las Vegas, today announced its new free Custom Playlist feature on YourLocalDJz.com, designed to give engaged couples complete control over the type of music and specific songs they want to hear at their wedding reception.

The Custom Playlist feature of services are conducted via online interactive forms. They cover everything from music genres, to artists, specific songs requested, to songs the couple does not want to hear. "The custom playlists are designed to benefit anyone who wants to be in complete control of their Wedding Reception music regardless of whether they will have a DJ at the event or not," said Patrick Carson, President of WeddingDJs LLC.

Each playlist will be created by Carson, who has been successful in the Las Vegas Wedding DJ market since 2003. He is a nationally recognized DJ who has trained other DJs how to succeed in the wedding DJ market.

Carson was a featured speaker this past May at the annual Wedding DJ Expo in Las Vegas. "Without proper guidance and direction a couple can have a mish-mash of music at their Reception that will end up not pleasing much of anyone. Many times a couple will base their music lists on what they like – completely ignoring the fact that parents and grandparents will also be attending the event. We want to make sure that a couple's custom Playlist matches the type of people who will actually be at the event," said Carson.

The Custom Playlist Feature of YourLocalDJz.com will bring complete control of a music list to wherever the client is, allowing anyone to send the list to anyone in the world with an email address. Carson continued, "If you want to make sure your music list has something for everyone at your Reception, then this Custom Playlist Feature will help you do it."
